The Night Window Dean Koontz

#1 New York Times bestselling author Dean Koontz brings Jane Hawk's one-woman war to an explosive climax as the rogue FBI agent wages her final battle against a terrifying conspiracy--for vengeance, for justice, and for humanity's freedom.

The Night Window A Jane Hawk Novel

Groundbreaking, wholly involving, eerily prescient and terrifyingly topical, Dean Koontz's Jane Hawk series sets a new standard for contemporary thrillers. Since her sensational debut in *The Silent Corner*, readers have been riveted by Jane Hawk's resolute quest to take down the influential architects of an accelerating operation to control every level of society via an army of mind-altered citizens. At first, only Jane stood against the "Arcadian" conspirators, but slowly others have emerged to stand with her, even as there are troubling signs that the "adjusted" people are beginning to spin viciously out of control. Now, in the thrilling, climactic showdown that will decide America's future, Jane will require all her resources--and more--as she confronts those at the malevolent, impregnable center of power.

This is the fifth book in the Jane Hawk Series and you really would want to read these in order. Mainly this series is about Jane, who is on a search to find out why her husband was killed and who did it. His death was set up to believe that he committed suicide but Jane knows better. She is hiding for her life depends on it as she is hunted by some government officials, who have a way to find their enemy. Jane used her intelligence to outsmart the enemy. She is an ex F.B.I. agent and is a wanted fugitive. This is the fifth book in the Jane Hawk Series and you really would want to read these in order. They use a drug and inflicts it into people, and then they have total mind control of them. They do it to those who they feel are a threat to society.

This book was super action packed. The books in this series, just get better and better. Make sure you have plenty of time on your hands because I didn't want to put this book down. This is a thriller series. I loved the writing style. This is a long book but the chapters are short and it has riveting suspense that makes it a fast paced read and it didn't take me long to finish it. My heart was pumping and I was holding my breath and coming up for air several different times to find out what was going to happen next.

I love Jane's character. She is an ass kicking heroine and doesn't seem to be afraid of any thing and truly trusts her instincts. I loved the dynamics of the characters.

The Night Window

I loved the ending. It was the perfect ending to the end of this series. Sadly, this is the last book of this series.

I highly recommend this series to thriller fans. Sadly, this is the last book of the series. So those that start this series are so lucky because you won't have to wait for the next book.

Apparently this is my week to read Hawk books. H is for Hawk earlier in the week and now I finish off the Jane Hawk series from Dean Koontz. I may not have had a glowing review for H is for Hawk, but the Jane Hawk series ended with a big and spectacular bang!

And, again, a standing ovation for Dustin Crazy little brown owl - moderator of Koontzland - the definitive Koontz Goodreads group - for hosting another book giveaway!

This whole series was great! There is so much to be found here, including:

- Lots and lots and lots of chases
- Very creepy bad guys
- Mind control
- Brain fried zombie monsters
- Espionage
- Corruption
- Computer hacking
- Black market deals
- Triumphant heroics
- Heroes you love to love
- Teeth-grinding, intensely perilous, suspenseful moments
- Events in the United States from coast to coast
- Characters losing touch with reality
- And, since it is Koontz, dogs!

I have read parts or all of a couple of Koontz’s other series (Odd Thomas and Frankenstein) and I think this one is his best so far. It does not have quite as much of the horror/supernatural creepiness that many expect from Koontz. So, if that is what you love about him, this may not be the series for you. But, if you love edge of your seat techno-thrillers, you cannot go wrong here!

Here are some links to my other reviews from the series – all of them very strong and worth reading, but read them in order or you will be very confused!

This is book 5 of the Jane Hawk series. And as most everyone is aware it will be the last in the series. I'm a relative newcomer to Dean Koontz's work - this being my only exposure to his writing. And while I've found it entertaining, it's been a bit of a roller coaster for me. There were some books in the series that I thoroughly enjoyed, leaving me breathless. While others seemed lacking, and more or less just a filler to the installment.

The last book, The Night Window didn't hold the excitement throughout that I'd hoped it would. I was hoping for something a bit different from previous books and I just didn't feel it.

But! The final 20% had me hooked! I couldn't wait to see how Dean Koontz was going to wrap up this highly successful series! Well done!!

I continue to love Bernie Riggowitz and Cornell Jasperson! My two favorite characters of the series! I will indeed miss them both! :-

I will now be watching for perhaps the start to a new series from Mr. Koontz.... I'm ready!!

There has been so much death of side characters that I worried my behind off about this one. Don't get me wrong, because I like authors who kill characters willy nilly, but dang it, it does ratchet up the tension. Jane and all the good people she met along the way are wonderful characters. Luckily, there were quite a few laughs along the way. The bad guys were mostly all nutjobs. Scary, sometimes funny and I did enjoy seeing them bite the dust! The thing with these books were how the brain nano-webs work, and who and why some insanomaniacs would think it's a great idea. This is something that could happen. The thought is terrifying. What kept this from being a 5 star series though is something as simple as the characters being so over the top exaggerated. Almost like a comic book. Still, I loved the series, and the ending. I'm often amazed a what writers come up with! Also, and I never say this, but I think this would make a great T.V. show.

This is a book "series of books" that I'd recommend. Just start at the beginning or you'll miss all the good stuff that leads to the end.

His goal is world domination and he has a â€œGod complexâ€• , he believes he is destined to rule. His group is now called the Arcadians. It is impossible for Jane, or anyone, to know which people have been implanted with the device since they act normally until they are commanded to do something, including committing suicide which Janeâ€™s husband had done. Likewise it is difficult for Jane to hide as there are surveillance cameras everywhere with sophisticated face recognition software which makes using conventional disguises useless.

Jane has had her son in hiding hoping to protect him from anyone who is tracking her trail.

In this book Jane finally has help in the form of FBI guy Vikram Rangnekar. He not only has obvious great tracking abilities but he is also a computer nerd who has a secret crush on Jane and will do anything he can to help her.

This was an entertaining read and Mr. Koontz keeps the action moving and Jane on the run. This book is a very good ending and I'm glad that he chose to keep the series fairly short which kept everyone's interest peaked.

I enjoyed reading this book and see that it is getting rave reviews from Koontz followers. I recommend it for sheer entertainment value.

I am glass eyed from trying in one night to finish Dean Koontz's The Night Window, the fifth and final Jane Hawk book. As much as I wanted to see much of what happened happen, I am really sorry to see this marvelous series end. Yeah, baby, parse that sentence.

Common wisdom says one should start this series from the beginning, but we aren't all adjusted yet. A major villain, Warwick Hollister, the guy with so much money that he makes single-digit billionaires look like simple trash, does a great job in summarizing the previous books. Hollister makes this grand summary, demonstrates some of his power to a filmmaker and then sends the filmmaker on a run for his life. Ah, what fun the super rich must have. Other than for the expository pages I'm not sure why so much time is devoted to Hollister's craziness and death chase of the filmmaker.

Former FBI Agent Jane Hawk has been fighting almost single handedly against a group called the Techno-Arcadians who have developed a means for widespread mind-control, through nano-technology; and therefore a new way to take control of the country, then the world. Jane has been on the run ever since she discovered her beloved husband Nick's suicide was not a suicide but part of the effort to eliminate anyone who might have the intelligence, the means, or the influence to fight the Techno-Arcadians. They just weren't smart enough to include an enraged

The Night Window

widow and fierce mother on their "Hamlet List"; the list of those slated as suicides for the same reasons and same method as Nick.

Jane is running out of steam and options. It seems as if every method she has used to escape detection is being eliminated. At the same time she is discovering there are people who don't believe Jane Hawk is the beautiful, murderous monster that the Techno-Arcadians have turned her into via the corrupt media.

Jane is joined by a former co-worker from the FBI, Vikram Rangnekar, a computer genius who is willing to aid Jane, along with the surprising help of his family.

Travis, Jane's five year old son is still under the protection of a man in his eighties and a younger man who is severely on the spectrum. At one point they encounter a woman with a secret basement who spent most of WWII hiding in a comparable basement. This is a true moment of grace and remembrance in this book, of what can really happen with an out of control government.

I love this series for the excitement, for the thought-provoking moments, for Koontz's masterful storytelling.

The ending of *The Night Window* caught me totally by surprise. So shocking, yet made so much sense. Did I mention shocking?

I'm really not sure what to write now. This is Dean Koontz, the master, the original; the Dean Koontz who writes books that readers still talk about twenty years after reading them So I will just sadly say good bye to Jane, Travis, Vikram, and all of the brave souls who helped Jane. I'll miss y'all.

The Night Window Review

I finished reading The Night Window a few days ago but needed a bit of time to get over my enormous book hangover. Actually, it's a Jane Hawk book hangover, and I'm going to miss her tremendously! Except for maybe Einstein from Watchers, Jane is my favorite Dean Koontz character, and I have read ALL of his books and own most of them (maybe all of them).

Koontz has an uncanny knack of bringing us the greatest of goodness in his characters but also the absolute worst, evil dreggs of humanity as well. He manages to infuse so much dark into his books, yet he balances it out with the light, and the hope of what humans are, or should be, in my eyes.

Jane Hawk is a formidable woman with some darkness of her own, but only what she needs to be able to combat the pure evil. She always manages to surround herself with the pure of souls to fight the horrendous humans. This is what I love so much about Koontz's work; the hope and love of his characters.

Although I am extremely content with how Koontz ended this series, I am extremely sad to leave Jane Hawk.

Thank you so much to NetGalley and Random House Publishing for an advance copy of this book!

Finishing this book brought back feelings similar to those I had after reading the last book in J.K. Rowling's Harry Potter series: I didn't want the journey to end, but I wanted the journey to end. I'm not sure this is the last we'll see of rogue FBI agent Jane Hawk, actually, but if it really does mark the end of this series, it brings a bang-up ending to her battle against mind-controlling powers-that-be who killed her beloved husband and threatened the very existence of society as we know it.

It's been a heck of a ride - this is the fifth book in the series - each and every one a winner in my book (in

The Night Window

order, *The Silent Corner*, *The Whispering Room*, *The Crooked Staircase* and *The Forbidden Door*). I will say, though, that while the books do stand alone, each builds on its predecessors, so I strongly recommend starting at the beginning if you're new to the series and want to maximize enjoyment thereof.

At the heart of the adventures is a secret but ever-expanding group called the Arcadians, who use implanted nanotechnology to infiltrate the minds of their victims and control their words and actions (and I won't even get into all the things they do to torture people). By this time, a large number of humans all over the country have been "adjusted," as the process is called - and it's been next to impossible to determine who's been infected (and thus, who can be trusted). Jane is determined to bring the group down, but in the process she's had to go to monumental lengths to avoid capture and hide her precious young son in the hope of keeping him safe. She's had a rough time of it in the preceding books, but so far both she and Travis - he with more than a little help from her friends - have eluded capture.

But it's getting much harder; at every twist, turn and corner are cameras loaded with face-recognition software that renders disguises like wigs and make-up virtually useless. Behind every stranger lurks the possibility of an Arcadian or a person whose mind is being controlled by them. As this story begins, Jane is researching mega-billionaire Warwick Hollister, who may be at the top of the ringleader chain. Meanwhile, oblivious to Jane's investigation, the egomaniacal Hollister is entertaining his twisted side by playing catch-and-don't-release in the snow with a terrified victim.

A few chases and near-misses later, Jane hooks up with FBI guy Vikram Rangnekar, a computer nerd with a larger-than-life crush on Jane. Young Travis, too, is facing unforeseen danger; it seems someone with an eye on a big payday has stumbled upon the boy and his identity. Jane's Spidey senses tell her he's in danger - but can she find a way to save him without losing them both (literally and figuratively)?

Don't expect me to answer; you'll just have to read it for yourself. At this point, there's nothing left for me to say except thank you to the author for an exciting series and the publisher, via NetGalley, for the opportunity to read and review an advance copy. Over and out!

An explosive conclusion to the bestselling Jane Hawk series by the renowned author Dean Koontz. The Night Window is a finale like no other with full-color characters, twists, and screams.

Jane, still on the run from the Arcadians, finds she cannot do this alone. Finding out that her distinct disguises will no longer work because of new technology becomes a new problem.

Meanwhile, a young director becomes wooed into a hapless situation with an Arcadian, that is to say, THE Arcadian. Observing a suicide and hearing the plot of the Arcadians, he is set off in weather most horrible only to be hunted. It soon becomes a race for his life. The man chasing him will stop at nothing until he is dead.

A man, a burglar and rapist, decides to make a cash smooth hit, only to find out that he may have hit the jackpot. When things go too well and too good to be true, things get ugly. Can he get away with his life?

The Tech Arcadians are getting desperate, and so is Jane. Making an ally of a man she didn't trust in the beginning, they venture forth to bring down the most evil organization there ever has been.

A shocking discovery, a host of allies and utilizing unorthodox methods, Jane and her friends venture forth down a path of no return.

Characters:

The villains are full color and so cold it makes the reader see just how talented Koontz is at creating characters.

The Night Window

By now, Jane is fully formed and well known; there are no mistakes, and individual character traits pop up that make her unique.

The allies are quirky, serious and bold. They show plausible traits and have great dialogue.

The book rides like butter without fail. The attention to the most minute detail is one that is not distracting but lends itself to each scene. Each nuance has given life to the story in ways that only Koontz can.

This novel is sure to please the followers of the Jane Hawk series and delight any Koontz fan into reading more of the writer's novels.

Writing:

There is nothing negative to say about Mr. Koontz's writing. He is a terrific, if not, genius as crafting a story so plausible so musical that it becomes more than a pleasure to read. The very way the words appear on each page, it makes one envious of the skill that was employed while creating the tale.

Plot:

The many subplots involved with the main plot came together perfectly towards the end with a bang. The surprising effect is something that cannot be duplicated well.

The ending was not predictable. Of course one would guess HOW it may end just not specifically. This is just how wonderful and unpredictable the story is.

What I Liked:

The very manner in the way the story progressed, the twists, the unpredictable and unprecedented nature of the story, that was enjoyable. I saw that the succeeding nature of the story would take place, just, not how. I was in shock and awe at the skill and the breadth of the information that came from her new ally and began rooting for him for the entirety of the book.

What I Didn't Like:

There were some slow and unnecessary parts of the book I felt. It almost seemed like parts of the story took unnecessary risks. I would have been happy if some characters hadn't gotten in the way.

Also, I would have liked to know More about her in-laws, who were in hiding since the last book.

Overall Impression:

Night Window by Dean Koontz is a marvelous book and a tremendous achievement for him to close off a series that has been so successful. Readers will not be disappointed to read this or any of the other Jane Hawk books. I rates this a 5.00.

This ARC was provided to me by Netgalley and the Publisher, Bantam, for an honest review, thank you.

REVIEW

Jane Hawk is a fabulously strong female character, who comes alive on the pages of The Night Window for a dramatic conclusion. I will miss her intelligent and thoughtful character and am delighted to see that at least the first book in this series, The Silent Corner, was optioned for television. In The Night Window, Vikram, the computer hacker is a new addition to the series and is a particularly endearing character.

The chapters are pleasantly short and each is told from one of several alternating perspectives. THE NIGHT WINDOW is creative and dramatic and DEAN KOONTZ's writing is both haunting and action-packed. The plot is crowded with amazingly unique and well-developed characters. Some you'll love, and some, you'll love to hate. As it should be. It's a contemporary thriller, and while it's sad to see a series with a fabulous female character come to an end, it's time. And the ending was...well, you'll just have to read it!

Jane Hawk again is battling the evil forces of the Arcadians, a group that wants domination so badly that they inject nanoparticles into people so that they can control them. Triggered by a phrase, the controlled group will acquiesce to the command of the speaker, and wreck havoc if they are instructed to do so, even to the point of their own suicide. It is mind control carried to the ultimate. It's a way to achieve domination and with every telling of the story, Dean Kootnz has created such amazingly vile and horrendous villains, as well as people who are valiant and stalwart.

In Jane, the author gives the reader an extremely strong brilliant protagonist, one that will go the ends of a earth to protect her son and the people she loves. Jane possesses that resiliency that have made her such a heroine and one that has propelled these five books into something special and fascinating.

Mr Koontz has been able to carry this story with his uncanny ability to present both the dark side of humanity contrasting with all that is good and noble in society. I am sad to see this series end as I could always look forward to a story that I knew would never disappoint me. I definitely recommend this book and the preceding ones to all of those readers who love being mesmerized and fascinated. Jane, you will be missed.

The Night Window Kindle

This is the last book in Koontz's Jane Hawk series, and he pulled it off in fine form with high style and care. There were a couple of coincidences in the book that troubled me a little (of all the homes in the world that the high tech burglar could have targeted, he happened to choose the one in which Travis and his protectors were hiding, and at one point Jane was more than a little lucky in approaching one particular random stranger for help), but overall I was pleased and surprised by the resolution to overall story. Multi-book stories are something of a risk to the reader; we're still waiting for winter to arrive, Robert Jordan never got the final spin of the Wheel, Christopher Golden and Thomas Sniegowski never finished The Menagerie series, and Koontz himself has yet to complete the Christopher Snow story, to name but a few. On the other hand, when it's done well it can be a terrific literary achievement, as Koontz did with Odd Thomas for example. Sometimes the ending doesn't hold up, and contradicts or is inferior to the previous books. (No, I didn't mention The Dark Tower, did I?) I'd suggest that these books need to be read in sequence, because it's more or less one very long novel, even though they take place in a relatively brief span of time. I was pleased that the stories of almost all of the many memorable and quirky side-characters are neatly wrapped-up, though enough mystery remains in one or two cases to stimulate reader speculation, always a good thing in moderation. Also, once the main story is resolved the book ends pretty swiftly and left me with a good feeling, as Koontz is adept at doing, and he avoided making it smarmy or -too- neat. All in all, it's a very good thriller series, and it raises some very thought-provoking points about technology and society, while never losing good pacing, elegant writing, and exciting story.

I won my copy of The Night Window in a Goodreads giveaway, and while that, of course, is not supposed to influence the reader's review one way or the other, I have to admit that there's something of a mild naughty thrill in getting to read the last part before the book gets its official release... which is also why I've tried to avoid any spoilers. ...more

The Night Window by Dean Koontz is the fifth and final installment in his Jane Hawk series. This is a series finale, but it still reads well as a standalone, though the series is best read in sequence.

researched and found an increase in suicide among unlikely candidates. Her discoveries have led her to seek and destroy members of a cabal bent on world domination. In an bid to thwart her efforts, Jane has been indicted for espionage, treason and murder. She is now the hunter and the hunted. This final installment pits her directly against evil and brings her some new allies.

This is a fast-paced thriller thatâ€™s too good to put down. The story is engaging on every level. Koontz ended this series the way it began: with a bang! The Night Window rates 5 out of 5 stars. This entire series is a must-read!

My thanks to Random House Publishing Group - Ballantine and NetGalley for the opportunity to read an advance copy of this book. However the opinions expressed in this review are 100% mine and mine alone.
