Attachment within life history theory: an evolutionary ... According to life history models [12, 13, 14], the attachment system is an important psychological mechanism that bridges the gap between early exposure to environmental harshness and/or unpredictability and life-history strategies enacted in adulthood. It does so because (a) the environmental input to which the attachment system is responsive (i.e. early caregiving experiences) is a key. Perspective (graphical) - Wikipedia Perspective (from Latin: perspicere "to see through") in the graphic arts is an approximate representation, generally on a flat surface (such as paper), of an image as it is seen by the eye. The two most characteristic features of perspective are that objects appear smaller as their distance from the observer increases; and that they are subject to foreshortening, meaning that an object's.
